

The image shows a login interface for CloudDigo. It features a light blue background with a faint aerial view of a city. On the left, there are three input fields labeled 'Account*', 'Username*', and 'Password*'. Below these fields are two buttons: a blue 'Log in' button and a white 'Create new account' button. To the right of the input fields is a large, stylized green logo consisting of concentric arcs, resembling a Wi-Fi symbol, set against a white cloud-like shape. The entire interface is reflected below it.

Chapter 1 Entering your account information

Creating a new account

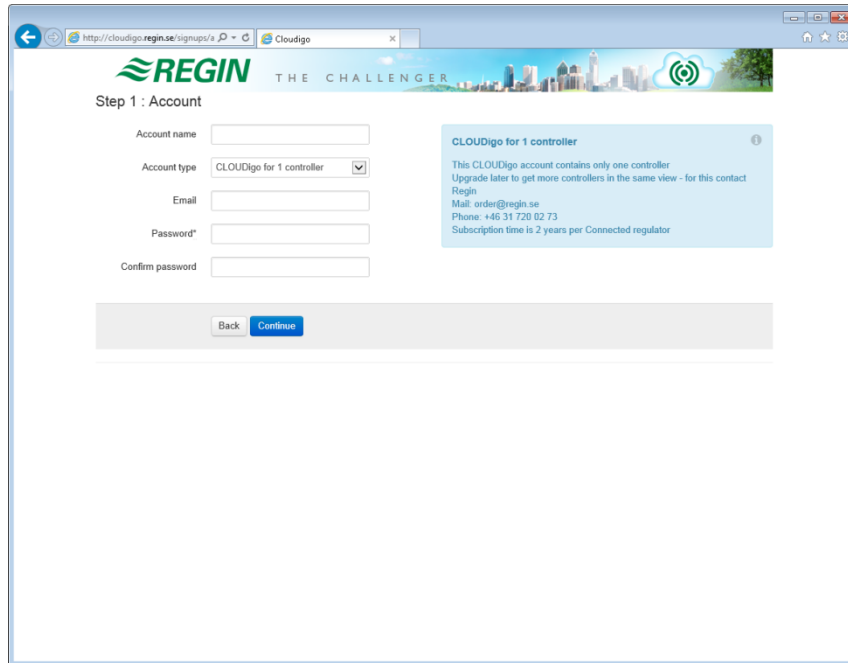

To create a new account, open your web browser and enter the address <http://cloudigo.regincontrols.com/>.

On the login page, press the button **Create new account**. Doing so will initiate a 5-step account registration process, described below.

Step 1: Account

This step permits entering the basic information necessary for your account.

The screenshot shows a web browser window with the URL <http://cloudigo.regin.se/signups/s>. The page header features the Regin logo and the tagline "THE CHALLENGER". The main heading is "Step 1 : Account". Below this, there are four input fields: "Account name", "Account type" (a dropdown menu currently showing "CLOUDigo for 1 controller"), "Email", and "Password*". Below the password field is a "Confirm password" field. To the right of these fields is a blue information box titled "CLOUDigo for 1 controller" with the following text: "This CLOUDigo account contains only one controller. Upgrade later to get more controllers in the same view - for this contact Regin. Mail: order@regin.se. Phone: +46 31 720 02 73. Subscription time is 2 years per Connected regulator". At the bottom of the form are two buttons: "Back" and "Continue".

Account name

This step is used to select what name the account should have. As this cannot be changed later, it is important to ensure that it is entered correctly.

Account type

This field initially only contains the option **CLOUDigo for 1 controller**. However, the account can be upgraded later to add more controllers. To upgrade your account, contact Regin's sales department.

E-mail

An account activation e-mail will be sent to this address.

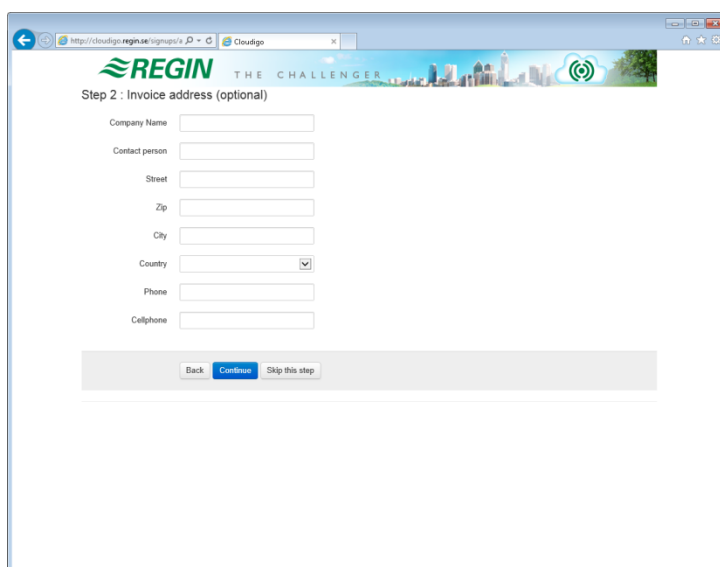

Password

Enter a password for logging in to your account. Confirm the password by typing it again in the field below.

After the above information has all been entered, press **Continue**.

Step 2: Address (optional)

This step permits entering your contact information. Doing so is optional during this step, but mandatory later on when starting your subscription.

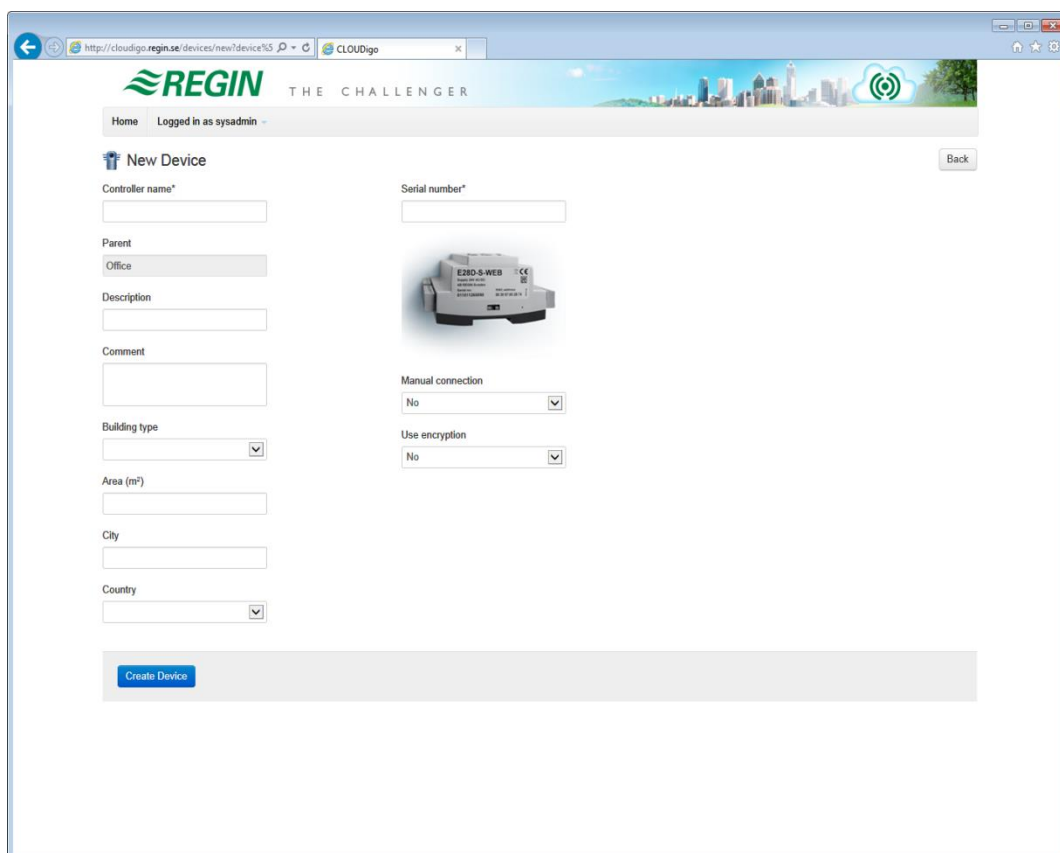

The screenshot shows a web browser window with the URL <http://cloudigo.regin.se/signups/step2>. The page header features the Regin logo and the tagline 'THE CHALLENGER'. The main heading is 'Step 2: Invoice address (optional)'. Below this, there are several input fields: 'Company Name', 'Contact person', 'Street', 'Zip', 'City', 'Country' (a dropdown menu), 'Phone', and 'Cellphone'. At the bottom of the form, there are three buttons: 'Back', 'Continue' (highlighted in blue), and 'Skip this step'.

Press **Continue** if you have entered your contact information.

Press **Skip this step** if you have not added any contact information.

Step 3: Device

This step permits adding information for the air handling unit (AHU) to be connected.

The screenshot shows a web browser window with the URL <http://cloudigo.regin.se/devices/new?device%5B>. The page header features the Regin logo and the tagline 'THE CHALLENGER'. The main heading is 'New Device'. Below this, there are several input fields: 'Controller name*', 'Serial number*', 'Parent' (a dropdown menu with 'Office' selected), 'Description', 'Comment', 'Building type' (a dropdown menu), 'Area (m²)', 'City', and 'Country' (a dropdown menu). To the right of these fields, there is an image of an air handling unit (AHU) and two dropdown menus: 'Manual connection' (with 'No' selected) and 'Use encryption' (with 'No' selected). At the bottom of the form, there is a blue button labeled 'Create Device'.

Controller name

The name of the AHU, to be displayed later. Can also be changed later on.

Serial number

The serial number on the controller, consisting of 12 digits and starting with “01...”. This is the serial number copied from the **TCP/IP settings tool**.

Manual connection

If a unit exists that is connected to a public IP address, its address can be entered here, enabling the CLOUDigo server to automatically locate the controller.

NOTE: This is an advanced function that is normally not intended for use.

Building type

Optional: The type of building in which the unit is installed.

Area (m²)

Optional: The area supplied by this unit.

City

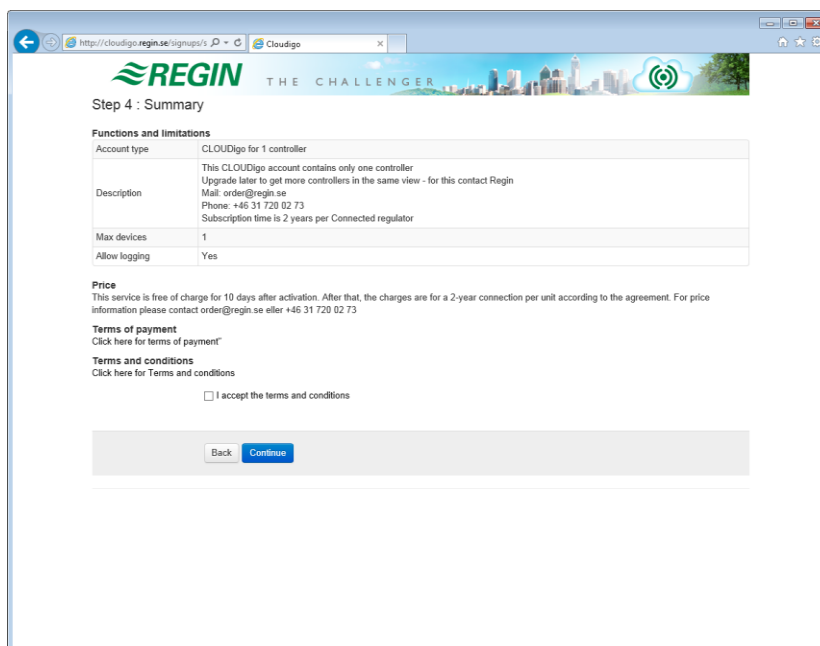

Optional: The city in which the unit is installed. Can be left blank.

Country

Optional: The country in which the unit is installed. Can be left blank.

Step 4: Summary

This page displays a summary of your new account. Check the box “I accept the terms and conditions” and then press **Continue**.

Step 4 : Summary

Functions and limitations

Account type	CLOUDigo for 1 controller
Description	This CLOUDigo account contains only one controller Upgrade later to get more controllers in the same view - for this contact Regin Mail: order@regin.se Phone: +46 31 720 02 73 Subscription time is 2 years per Connected regulator
Max devices	1
Allow logging	Yes

Price
This service is free of charge for 10 days after activation. After that, the charges are for a 2-year connection per unit according to the agreement. For price information please contact order@regin.se eller +46 31 720 02 73

☐ I accept the terms and conditions

[Back](#) [Continue](#)

Step 5: Finished

An e-mail will be sent to the address specified in step 1 of the account registration process (see page 3).

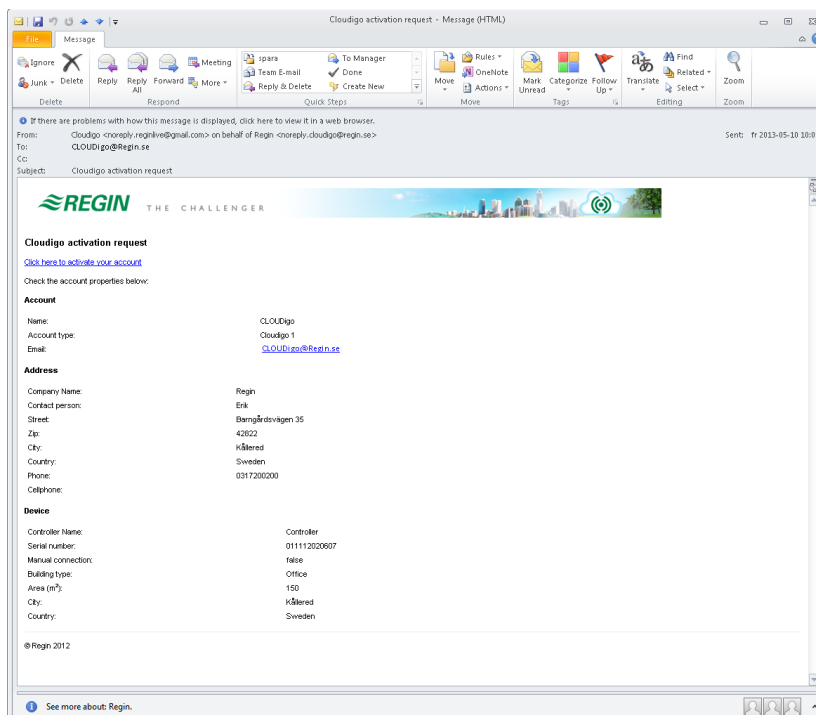

Step 5 : Finished

Signup was successful. A confirmation email was sent to CLOUDigo@regin.se

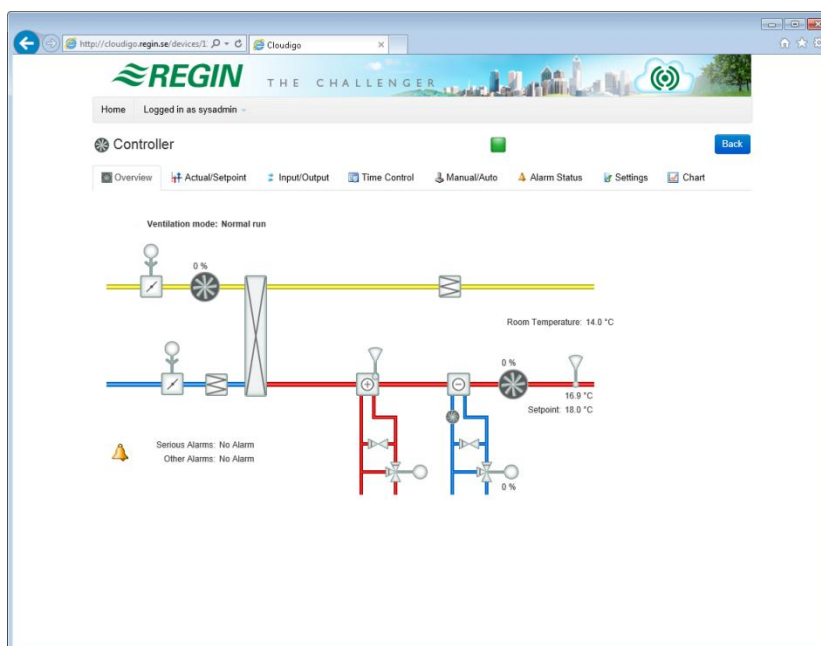

Activating your account

The e-mail sent to your account contains a link entitled **Click here to activate your account**.

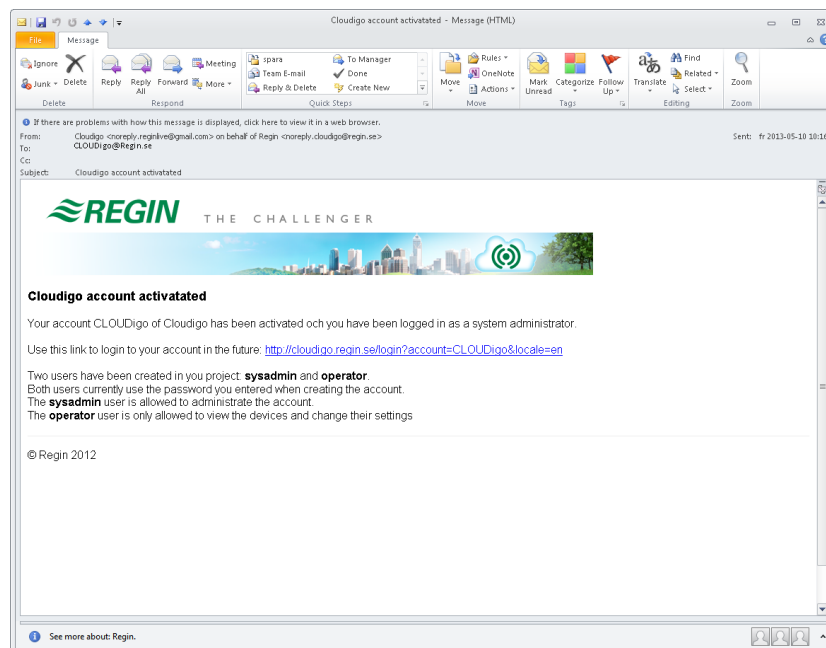

Clicking this link will automatically activate your account and log you in. If your controller is also online, it will be visible immediately.

Please note: When connecting a new unit, it might take up to 10 minutes for it to become visible online in the system.

You are now online.

Upon account activation, an e-mail notification will be sent out. The e-mail will inform you that your account is now activated and that two users have been created. Both will use the same password selected when creating your account.

Sysadmin

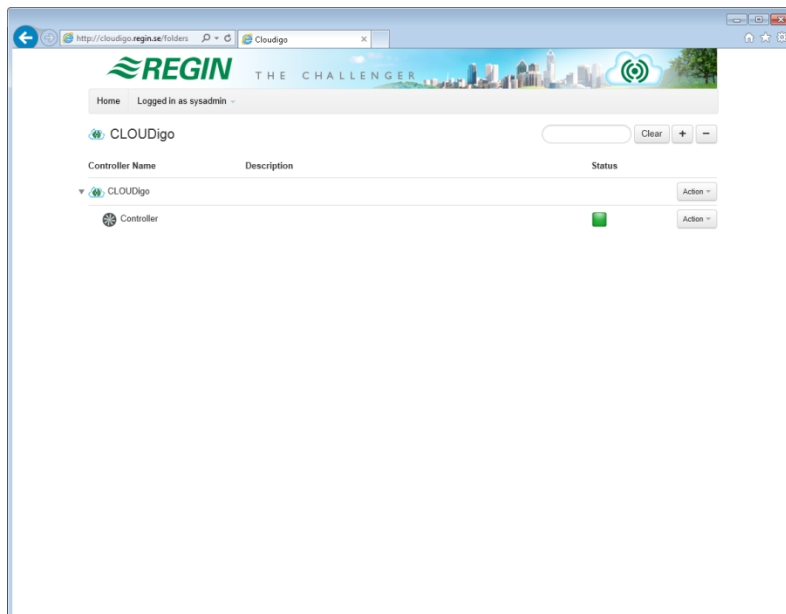

This is the highest user level, permitting viewing and changing all controller settings. The Sysadmin can also add/change users and add more controllers to an account. The password for logging on is the same as the one chosen by you when registering your CLOUDigo account.

Operator

Users belonging to this level can only view controllers and change some of their values using the site. Operators cannot use the account to add or change controllers or users.

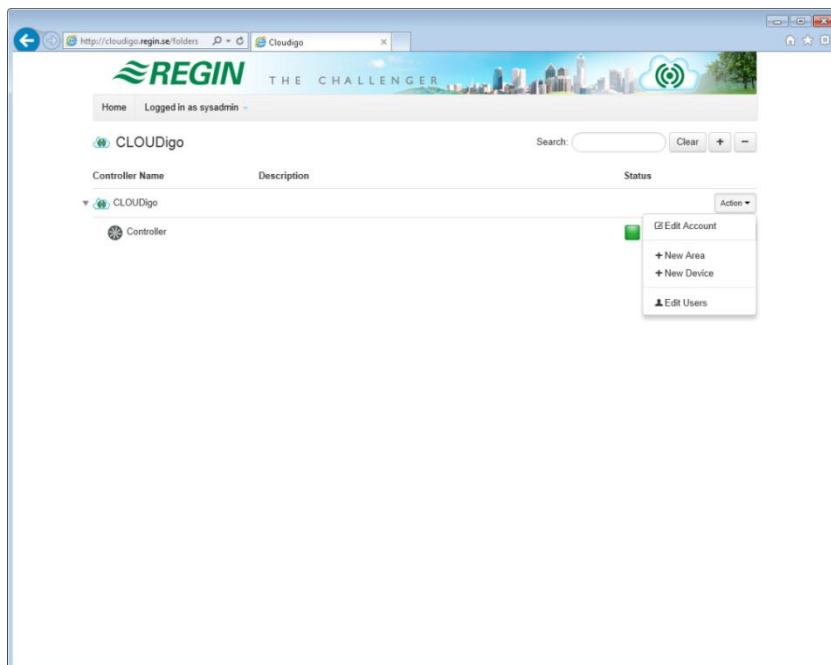

System administrator guide

For advanced users only.

Chapter 2 Administrating your account

When logged on as a system administrator (sysadmin), you can make changes to your account from under **Action**. It is possible to add more users as well as to add another unit to your system.

In order to add additional controllers, it is however first necessary to upgrade your account, as it will otherwise support only one controller. Contact Regin's sales department via order@regin.se to upgrade your account.

CLOUDigo for 1 controller

This CLOUDigo account contains only one controller.
To get more controllers in the same view, upgrade by contacting Regin.
E-mail: order@regin.se
Phone: +46 31 720 02 73

Edit account

Account and contact information.

New area

Create a new area for organizing your controllers.

New device

Add a new controller to the system.

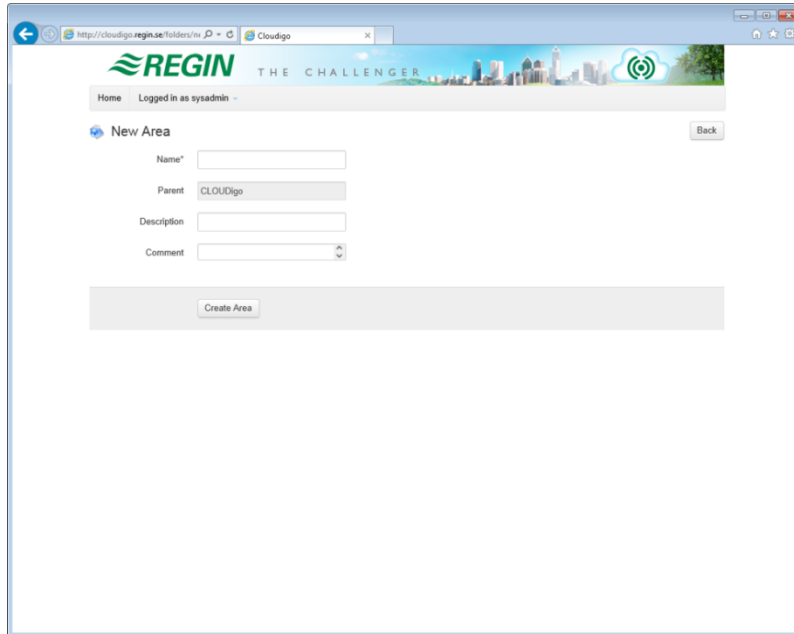

Edit users

Edit, add or remove users.

New Area

Used from under your account to create a new area in which to organize your controllers.

Select **New Area**.

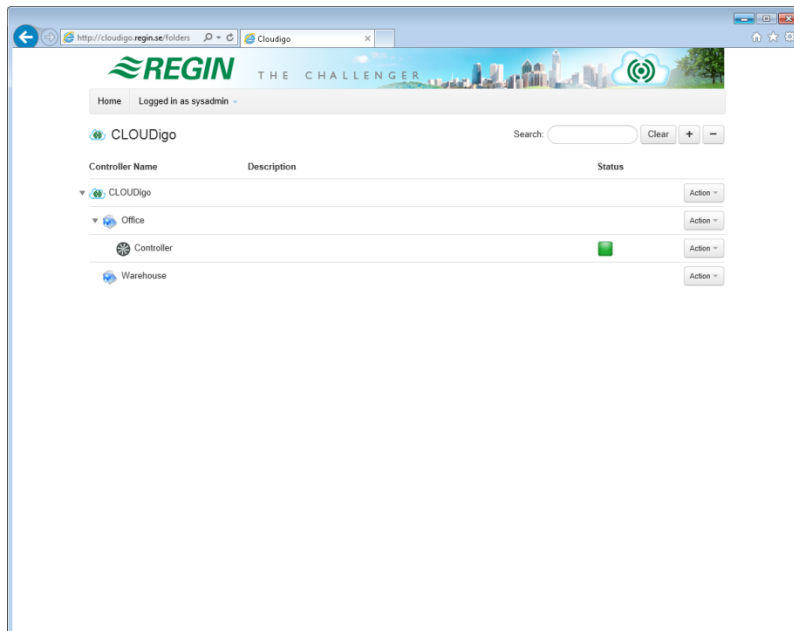

The screenshot shows the 'New Area' form in the Regin Cloudigo web application. The browser address bar shows 'http://cloudigo.regin.se/folders/new'. The page header includes the Regin logo and the tagline 'THE CHALLENGER'. Below the header, there is a navigation bar with 'Home' and 'Logged in as sysadmin'. The main content area is titled 'New Area' and contains the following fields:

- Name***: A text input field.
- Parent**: A dropdown menu with 'CLOUDigo' selected.
- Description**: A text input field.
- Comment**: A text input field with a small icon on the right.

At the bottom of the form is a 'Create Area' button.

Name

The name of your area (see picture 2, below, for an example of an account with two areas named “Office” and “Warehouse”).

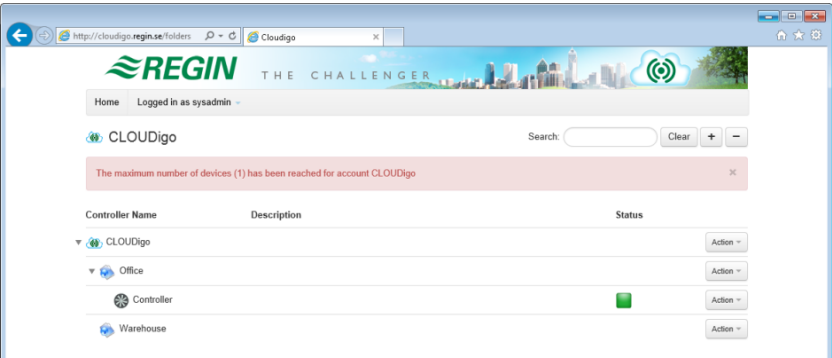

The screenshot shows the 'CLOUDigo' area list in the Regin Cloudigo web application. The browser address bar shows 'http://cloudigo.regin.se/folders'. The page header includes the Regin logo and the tagline 'THE CHALLENGER'. Below the header, there is a navigation bar with 'Home' and 'Logged in as sysadmin'. The main content area is titled 'CLOUDigo' and contains a search bar and a table of areas.

Controller Name	Description	Status	Action
▼ CLOUDigo			Action
▼ Office			Action
Controller		Green square icon	Action
Warehouse			Action

New device

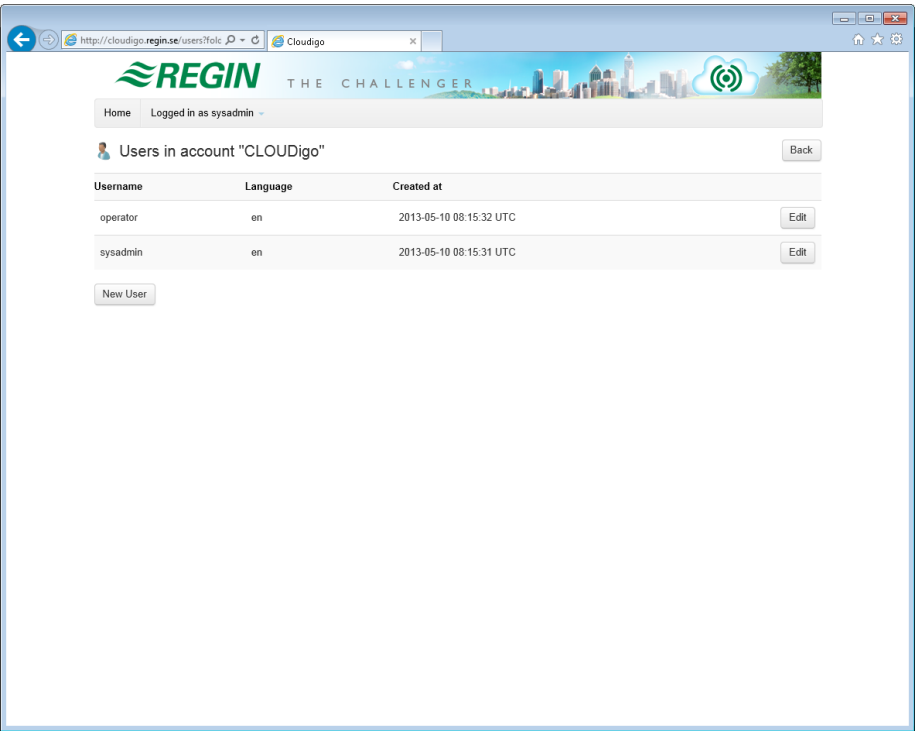

To add more controllers, your account must first be upgraded, as attempting to add any additional controllers will otherwise result in the below error message. See [page 11](#) above for information on how to upgrade your account.

Editing users

Press the action button on the account level and select **Edit users**.

To see or change information about existing users, press **Edit**.

New User

Permits adding new users.

Access Levels

Guest: Can see all values. **Cannot** change any values. **Cannot** add new controllers or users to the system.

Operator: Can see all values. Can change values using the tabs **Actual/Setpoint** and **Time control**. **Cannot** add new controllers and users to the system.

Service / Admin: Can see all values. Can change all values. **Cannot** add new controllers and users to the system.

Sysadmin: Can see all values. Can change all values. Can add new controllers and users to the system.

Email

The user's email address to send alarm emails to if the checkbox "Receive alarm emails" is checked.

Receive alarm emails

Sends sum alarm by email to the user when a controller's status changes from "Normal" to another status.

The different statuses are represented by the following icons in the web browser:

Normal

Alarmed

Acknowledged but still active

Returned

Blocked

Offline

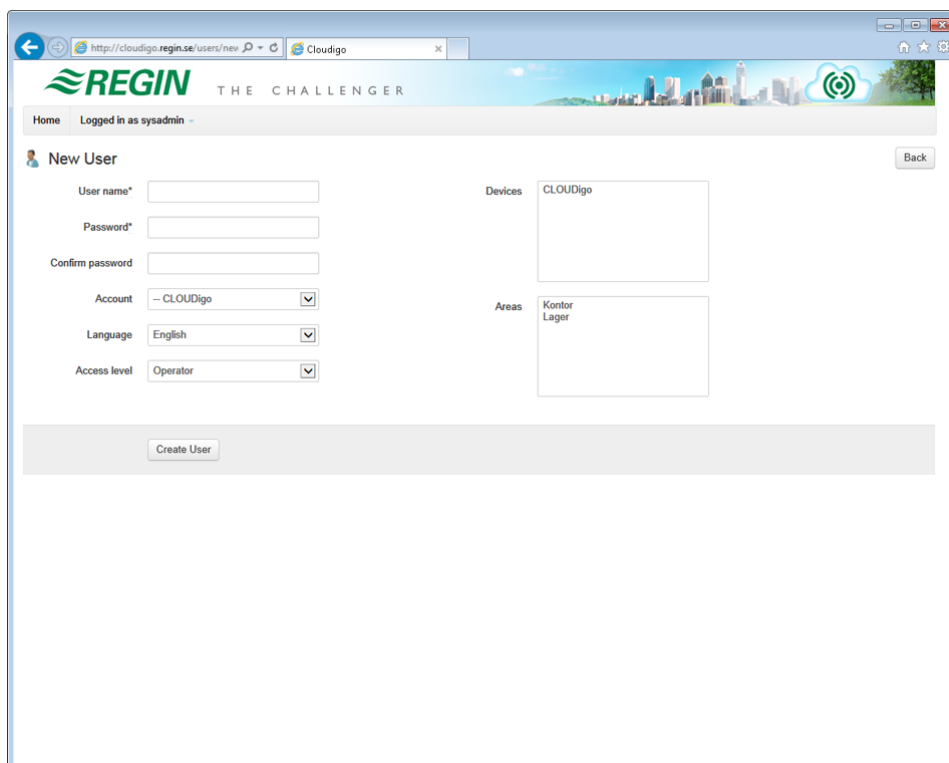

Read more in [Chapter 3, Alarm notifications](#).

Devices

The devices to which this user is granted access. To uncheck a device, hold down Ctrl and select/deselect it.

Areas

The areas to which this user should be granted access.

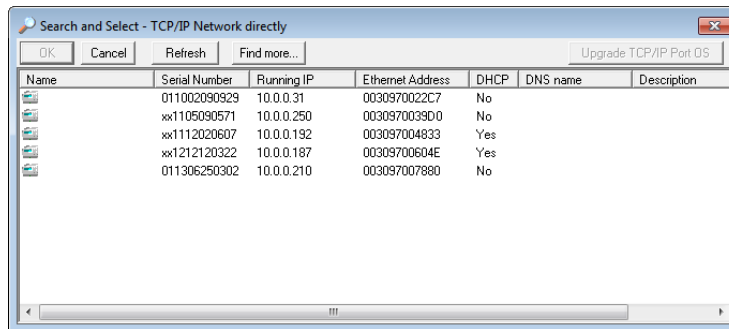

The screenshot shows a web browser window with the URL <http://cloudigo.regin.se/users/new>. The page header features the REGIN logo and the tagline 'THE CHALLENGER'. Below the header, a navigation bar indicates 'Home' and 'Logged in as sysadmin'. The main content area is titled 'New User' and contains several input fields and dropdown menus. On the left, there are fields for 'User name*', 'Password*', 'Confirm password', 'Account' (set to 'CLOUDigo'), 'Language' (set to 'English'), and 'Access level' (set to 'Operator'). On the right, there are two sections: 'Devices' with a dropdown menu showing 'CLOUDigo', and 'Areas' with a dropdown menu showing 'Kontor' and 'Lager'. A 'Back' button is located in the top right corner. At the bottom of the form, there is a 'Create User' button.

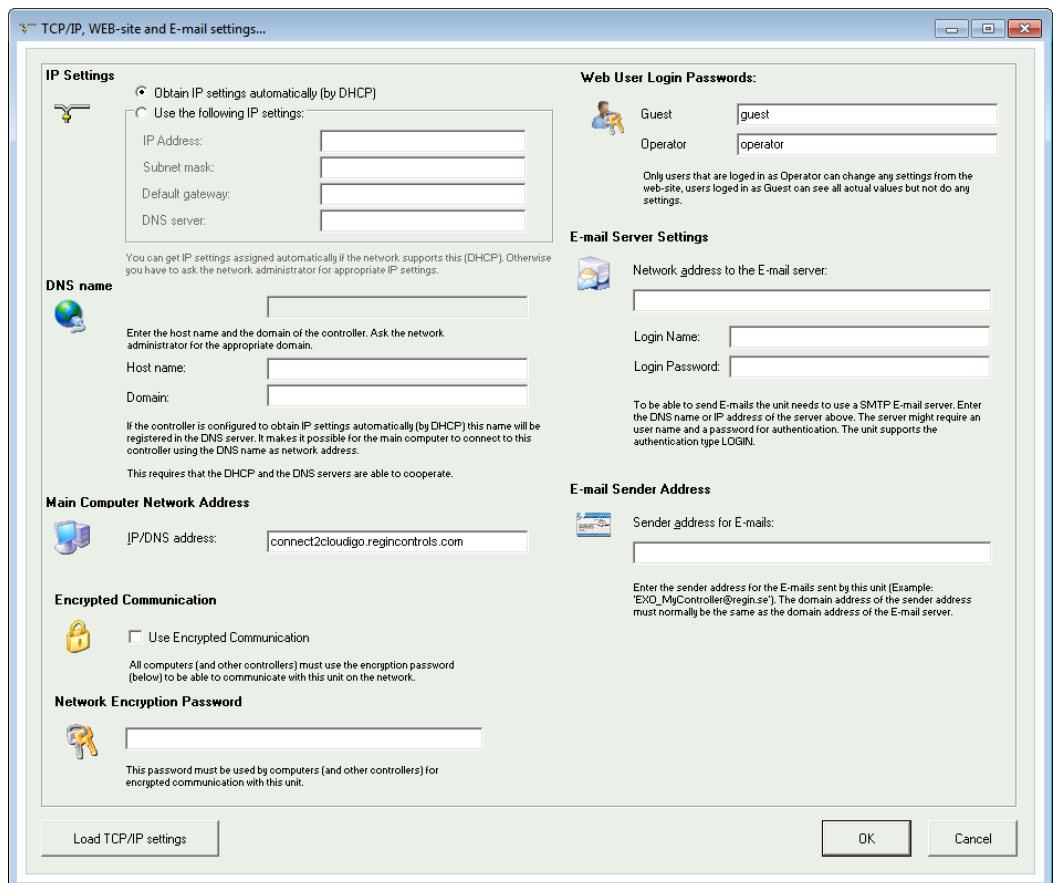

Preparing your controller for the cloud using Exigo tool or E tool®

Please note: This section pertains only to Exigo tool and E tool® version 3.2 and later. If using an earlier version of E tool®, please update to the current version or skip this section and follow the instruction on the next page.

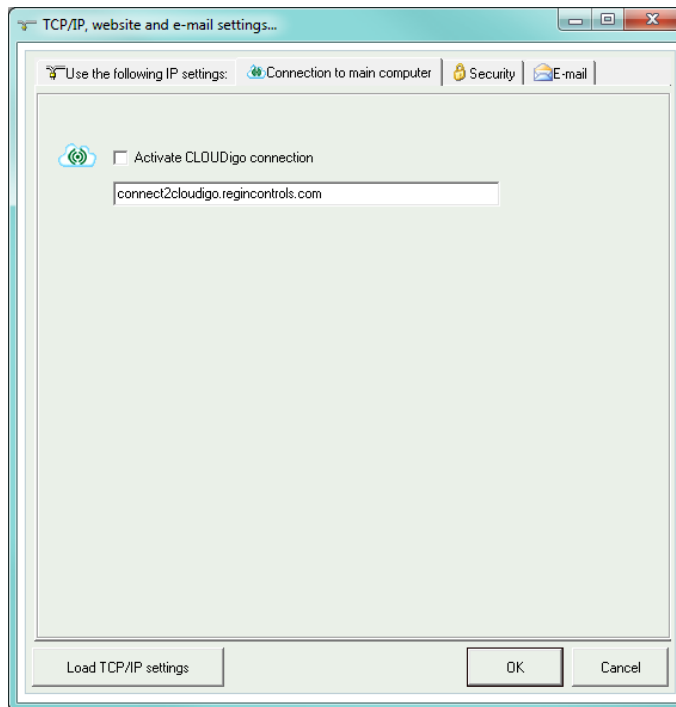

Locate your Corrigo or Exigo on the network and then select it.

In the field **Main computer network address**, enter the address **connect2cloudigo.regincontrols.com**. In E tool® 3.2, this information is entered into the window below:

In E tool® 3.3 and later, and in Exigo tool, this window has a different appearance and instead appears as below:

Once the address has been entered, press **Load TCP/IP settings**.

From this window, copy/save the serial number visible on the screen. This will be used later on, when adding the controller to your account. The “xx” in the beginning of the number needs to be changed to “01”. This number is also visible on the sticker of the controller.

Important: If you do not use DHCP, the IP address, subnet, gateway and DNS server must all have valid addresses that are consistent with the network.

Your controller should now be ready to connect to your CLOUDigo account.

Preparing your controller for the cloud with TCP/IP settings tool

Download and install the latest TCP/IP settings tool from Regin's web site (<http://www.regincontrols.com/>).

Regin TCP/IP Settings Tool

Connected Controller

Serial Number: xx0811180946
Ethernet Address: 00309700183A Search...

Controller Name

Name: Corrigo Controller
Description:

IP Settings

☒ Obtain IP settings automatically (by DHCP)
☐ Use the following IP settings:

IP Address: 10.0.0.185
Subnet mask: 255.255.255.0
Default gateway: 10.0.0.1
DNS server address: 10.0.0.129

You can get IP settings assigned automatically if the network supports this (DHCP). Otherwise you have to ask the network administrator for appropriate IP settings.

DNS name

Full DNS Name:
Enter the host name and the domain of the controller. Ask the network administrator for the appropriate domain.
Host name:
Domain:

If the controller is configured to obtain IP settings automatically (by DHCP) this name will be registered in the DNS server. It makes it possible for other computers to connect to this controller using the DNS name as network address.
This requires that the DHCP and the DNS servers are able to cooperate.

Main Computer Network Address

IP address: connect2cloudigo.regin.se

Load TCP/IP settings Security... Close

In the field Main computer network address, enter connect2cloudigo.regincontrols.com.

Press **Load TCP/IP settings**.

From this window, copy/save the serial number visible on the screen. This will be used later on, when adding the controller to your account. The “xx” in the beginning of the number needs to be changed to “01”. This number is also visible on the sticker located on the controller.

Important: If you do not use DHCP, the IP address, subnet, gateway and DNS server must all have valid addresses that are consistent with the network.

Your Corrigo should now be ready to connect to your CLOUDigo account.

Chapter 3 Alarm notifications

CLOUDigo has an e-mail alarm function where users can be notified of alarms sent by controllers in their controller tree.

Alarm notification functionality

Every 10 minutes, a service checks if the controller has an active or returned alarm (an A, B, or C event). If it does, the service sends an e-mail to all users in the controller tree who have this setting activated. If the controller does not have any alarm, the service clears the list of users that received an e-mail notification.

If a user has received an e-mail alarm notification, and in the next check there is an active or returned alarm (the same or another), the user will not receive any additional e-mail. Notified users will not receive any new alarm e-mails until the alarm check has detected no alarms (or only blocked or acknowledged alarms) on that controller and cleared the list of notified users. Only then, the user will be notified about new alarms that occur.

Activate alarm notification

For a user to get an email notification when an alarm is activated in a controller in their user group, you need to activate this function for that user.

Go to [Chapter 2](#) to read more on administrating user accounts. To get to the view below, press the action button on account level, select **Edit users**, and press the **Edit** button next to the user that should receive email notifications.

Home System Logged in as testuseremail@organisation.c

Edit User Back

User name* testuser

Created 2023-11-29 11:13:08 UTC

Password

Confirm password

Account - TestAccount2911Banner

Language English

Access level SysAdmin

E-mail testuseremail@organisation.com

☒ I want to receive sum alarms via e-mail

Update

Select the “I want to receive sum alarms via e-mail” checkbox, and press **Update**.

Please note: This setting is not available to all user levels.

 Root

Search:

Controller name	Description	Status
▼  Root		<input type="button" value="Action"/>
▶  TestAccount2911Banner		<input type="button" value="Action"/>
▼  TestParent		<input type="button" value="Action"/>
▼  TestChild		<input type="button" value="Action"/>
 TestUserHCV203DWM2		<div><div></div><input type="button" value="Action"/></div>

In the scenario above, users in the folders *TestParent* and *TestChild* with this setting activated will receive e-mails if there is an alarm in the *TestUserHCV203DW2* controller. Users on Root level cannot receive any e-mails since this setting is not available for these (and some other) account types.
