FILTES MANOMETERS AND AIR DIFFERENTIAL PRESSURE SWITCHES
DB-M...P...

## FUNCTION

Differential pressure visualization of air or non aggressive and non inflammable gases with alarm at a pre-set value. The compact unit is complete of:

- differential manometer with inclined liquid tube;
- differential pressure switch.

## APPLICATIONS

Well-suited in domestic, commercial and industrial strong polluted areas in air conditioning systems for:

- filter monitoring;
- correct fan operating control;
- low pressure and overpressure monitoring.

## GENERAL FEATURES

The compact unit is complete of:

- a differential manometer with an inclined liquid pipe, complete of tank to allow temporary overpressure,
- a bottle containing indication liquid and 2 stickers (red/green);
- a differenital pressure switch connected to the manometer with PVC hose, complete of pressure adjustment knob, terminals for electrical connections and cable gland PG 9 (protection class according to EN 60529: IP54);
- PVC hose $\varnothing 4 \times 7$ - $2,2 \mathrm{~m}$ length, pipes and fixing screws.

## WIRING DIAGRAM

The contact 1-2 closes and the contact 1-3 opens when the differential pressure rises (fig. 1):
