

ENVIRONMENTAL POLICY FOR AB INDUSTRIE TECHNIK SRL

"Environmental protection is at the heart of our decisions: we act responsibly today to ensure a sustainable tomorrow."

AB Industrietechnik Srl operates in the heart of the Alps, in Bressanone, a region that has always combined industrial innovation and respect for nature. Aware of the environmental and landscape value of its Alpine setting, the company adopts a thoughtful approach consistent with its role in the region.

The solutions developed by the company for regulating indoor climates contribute to a more careful and responsible use of resources in buildings. Product reliability and durability are part of the company's approach, which emphasizes informed design choices and a constant focus on quality and innovation.

AB Industrietechnik Srl, considering its objectives, the context in which it operates, and its established strategic directions, has implemented an Environmental Management System with the aim of:

- safeguarding and protecting the environment by controlling aspects and minimizing significant environmental impacts;
- adopting an approach to continually improving performance and operational processes, identifying, where possible, specific environmental programs, objectives, and targets;
- disseminating the Environmental Policy to its employees, customers, and suppliers;
- engaging and raising awareness of the contents of the Environmental Policy among its employees, customers, and interested parties.

Specifically, and in relation to the environmental aspects identified and assessed, the Environmental Management System of **AB Industrietechnik Srl** is aimed specifically at:

- limiting atmospheric emissions that may arise from product manufacturing operations;
- limiting and reducing waste production;
- limiting water discharges to ensure proper quality;
- optimizing the use of natural resources;
- preventing pollution by eliminating and/or minimizing environmental risks through the adoption of appropriate operating methods and economically sustainable technologies.

ENVIRONMENTAL POLICY FOR AB INDUSTRIETECHNIK SRL

Management is committed to implementing the above and pursuing continual improvement of the Environmental Management System through:

- complying with applicable environmental legislation, specific authorizations, and any other regulations, including voluntary compliance;
- maintaining and promoting ongoing collaboration and transparency with institutions, the community, and all interested parties;
- considering the requirements arising from contractual agreements with third parties as binding;

AB Industrietechnik Srl is committed to communicating this Policy within the organization, making it available to interested parties, and, if necessary, reviewing it periodically.

The Management
