ED-T43L-V

External touch display

Graphic touch display for Corrigo controllers, intended for monitoring and control of an air handling system.

✓ Clear and easy interaction

✓ Appealing and intuitive design

✓ Plug and play

Application

ED-T43L-V is a user-friendly touch display with an appealing design suitable for all types of indoor environments.

Function

The display has a logically structured and easy-to-navigate menu system that makes it easy to read, set and change values. Among many other things the display permits:
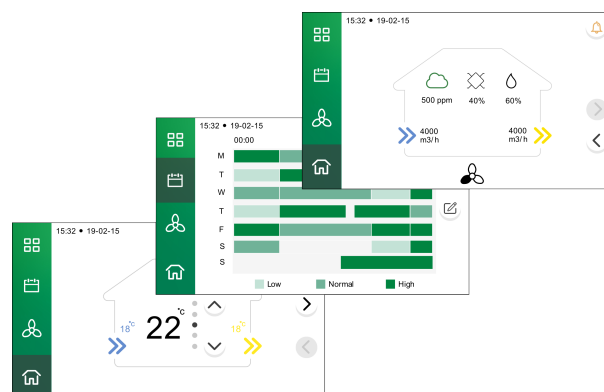

✓ reading and configuring setpoints and actual values

✓ viewing and handling alarms

✓ starting/stopping the air handling unit

✓ configuring time channels

✓ changing fan settings

✓ setting address, TCP/IP and CLOUDigo settings in the controller

The users have access to different settings depending on the assigned access rights. This makes the display very useful for all kinds of users, from the administrator to the local service technician.

Installation

The display is connected to the display port on the Corrigo controller. Cables of different lengths are available for quick connection. Power is supplied from the controller via the cable.

The display is pre-configured upon delivery and can therefore be used directly. It shows the controller configuration that can be changed with the free software *Application tool*, which can be downloaded from Regin's homepage.
